## Rewinder Inspection Machine M160-38

This kind of machine is especially designed for sensitive technical textiles. The inspection machine in any case is the backbone of a high-end and quality-related manufacturing of finished products thanks to a comprehensive monitoring and inspection of the individual process steps. This enables the operator to react immediately, which in turn leads to quality improvement and reduction of expenses. Apart from its built-in functions the inspection machines has the advantage to wind even special fabrics without any difficulties and thus support our customers as to their endeavour to quality intensification and cost cutting.
