Winder A-Frame M270-06

The big batching winder at the exit of a Raschel machine is suitable to wind elastic knit fabric onto an A-frame. Synchronization with the Raschel machine is made by a compensating roller mounted in the winding frame. The drive is coupled with the shaft extension. Special expanding devices guarantee a crease-free winding without curling selvages. The manufactured A-frame can be transported directly from the Raschel machine to the washing machine by means of the A-frame.
